PROFESSIONAL SUMMARY

Computer Engineer and Full Stack Developer with a strong self-taught foundation and experience in both on-site and remote work environments. Specialized in the React/Next and Vue/Laravel ecosystems. My profile combines technical development with UI design skills (Figma) and teaching experience in languages such as C/C++, Java, and JavaScript. I focus on writing clean, scalable code and efficiently solving complex problems.

WORK EXPERIENCE

Lumentrack | Freelance Frontend Developer (React)

Jan 2026 – Present (Part-Time, Remote)

- Integrated Google Maps Platform (Solar API, Geocoding API) and PVWatts API for energy calculations and geographic visualization.
- Developed image editing tools and interactive geometric shape drawing features using Konva.js.
- Implemented document upload workflows, dynamic PDF generation, and custom templates.
- Built dynamic commenting systems with user mentions (@user) and complex reactive forms.

Tecnilotto | Technical Consulting / Auditing

Apr 2026 – May 2026 (Part-Time, On-Site)

- Conducted technical security and code quality audits.
- Managed GitHub branches, resolved conflicts, and set up development environments.
- Investigated critical failures, created technical reports, and documented system stability measures.
- Provided technical support to the helpdesk team.

Kunaisoft | Full Stack Developer (Vue-Laravel)

Apr 2022 – Dec 2025 (Full-Time, Remote)

- Developed and maintained applications using Vue 2 (Nuxt/Vuetify) and Laravel 7 (MVC, routes, models).
- Implemented streaming modules using the Bunny Stream API.
- Managed servers via cPanel and handled repositories in Bitbucket under CI/CD pipelines for automated deployments.

CloudComputing Perú | Freelance Frontend Developer (Angular)

Jul 2024 – Oct 2024 (Full-Time, Remote)

- Developed scalable applications using Angular 9/16 and React with TypeScript.
- Implemented digital signature workflows and optimized performance in existing applications.
- Worked under Agile methodologies (Scrum/Kanban) using Jira and GitLab for version control.

Nelumbo Consultores | Software Engineer

Jun 2023 – Dec 2023 (Full-Time, On-Site)

- **Android:** Developed responsive interfaces with Kotlin and Jetpack Compose, including native PDF viewer integration via API.
- **iOS:** Built a payment management app with SwiftUI, integrating encrypted communication (SHA-224) with an Express backend and Google Maps SDK.
- **Backend:** Refactored business logic in Laravel 7 and managed AWS instances via SSH (PuTTY).

SEO Contenidos | Web Developer

Jun 2021 – Sep 2021 (Full-Time, On-Site)

- Developed custom WordPress themes and plugins from scratch.
- Ensured quality standards according to W3C guidelines and official WordPress.org requirements for theme validation.

TECHNICAL SKILLS

- **Frontend:** HTML5 (Semantic/SEO), CSS3 (BEM, Sass), Tailwind, Bootstrap, JavaScript (ES6+), TypeScript, React, Vue.js, Angular, Redux
- **Backend:** PHP (Laravel, Symfony), Node.js (Express), Python (Django, Flask), WordPress
- **Mobile:** Kotlin (Jetpack Compose), Swift (SwiftUI)
- **Databases:** MySQL, PostgreSQL, Oracle, SQL Server, MongoDB
- **Tools & Environment:** Git, Postman, Figma, Docker, AWS, Linux (Ubuntu/Shell), Vite
- **AI Tools:** Claude, Gemini, ChatGPT (Prompt Engineering, Code Assistance)

EDUCATION

- **Computer Engineering** | Universidad Nacional Experimental del Táchira (UNET) | *Dec 2025*

LANGUAGES

- **Spanish:** Native

English: Intermediate
